PROJECTS

Subscription Management app . Developed a comprehensive React application focusing on user authentication and management, encompassing essential features such as login, registration, dashboard, and membership functionalities. Utilized React Router for seamless navigation and Tailwind CSS for sleek and responsive styling.
([Take a look!](#))

Weather App. Developed a React-based weather application enabling users to access global weather conditions. Key features encompass location-based weather updates, support for metric/imperial units, comprehensive forecasts, and responsive design for seamless accessibility across devices.
([Try it here](#))

Portfolio Website. Created a React-based portfolio website showcasing personal introduction, experience, and project portfolio, highlighting frontend development skills and utilizing React and TailwindCss for responsive design.
